Frieze London is back, bigger and better than ever, bringing with it the global art cognoscenti as they scour the offerings at the Regent's Park centre and beyond. Painting continues to dominate, and everyone's in on the artistic act (and looking for somewhere to sit down among oversized sculptures) – but at least London's restaurants and bars can provide some respite among the madness and sticker-peeling. From the fair's colourful highlights to the best places to stop off for a bite to eat when things get a little crowded, this is the ultimate checklist to the world's greatest contemporary art fair.

## 1. Susan Weil, Sundaram Tagore Gallery

Seventy years of Susan Weil's work is on display alongside brand-new pieces at Sundaram Tagore's newest gallery at Cromwell Place. Weil is best known for pushing the boundaries of Abstract Expressionism – a movement primarily defined by male painters – across figurative, portrait, and landscape paintings. New creations see the veteran creative experiment with a new technique, creating controlled cracks in glass and mirrors to fracture the picture plane literally.
